

North Dundas District High School

Dear Parents,

I would like to welcome you and your son/daughter to North Dundas District High School and more specifically the Science program. Your son/daughter is enrolled in the grade 9 Applied Science (SNC 1PO) course for the first semester. I would like to take this opportunity to introduce myself and the course to you.

My name is Deanna Corbett-White; I have been teaching at North Dundas for the past 25 years in the Science, Physical Education and Photography programs.

SNC 1PO is a project based course which allows students to get involved with computer technology and hands on activities. Students are expected to be on time and prepared for class daily. They will need a binder, paper, pen, pencil and ruler for all classes. If students are away from school they are responsible for material covered in their absence. All lessons can be found on our class website (see below). See the attached sheet with details of unit topics and evaluation schemes.

Students are expected to be responsible and take proper care of the books. Students are asked to return the books as they have received them – unmarked. Lost or damaged books will be expected to be replaced by the student at an estimated cost of \$80.00.

I sincerely hope your son's/daughter's experience is a pleasant one. I am here to try to make the next few months as enjoyable as possible.

Please **check out our class website** at <http://deannacorbett-white.wix.com/nddhs> . Students and parents will be able to find the class lessons, homework and necessary information on this site. If a student is away they are expected to check this site for missed work.

Please feel free to contact me via e-mail or phone at deanna.corbett-white@ucdsb.on.ca or 613-448-2328 ext 4810 at anytime. I look forward to partnering with you to ensure a successful semester for your son or daughter.

Sincerely,

Deanna Corbett-White

I have read the introductory letter and am aware of the materials my son/daughter needs for this class, how they can access course information from home and how to contact the teacher if necessary.
